# MORCO

## Victorian Awning

Recognised as a design classic, the Victorian Awning is expertly hand-crafted in our Thameside workshop. This traditional awning is strong, practical and versatile and remains a preferred option with design teams and architects. The Victorian Awning is also the recommended choice for historic and listed buildings, but it is equally sought after as a solution for projects in a more contemporary setting.

## History

Morco was founded in London in 1956 by Mr G H Morrison as a specialist manufacturer of canopies, covers, sails and tarpaulins for London's busy waterways. His popularity with employees and customers saw his business grow steadily. In 1967, Morco moved to their current Riverside location on the Greenwich Peninsula. 1978 saw his son George take over the company and he was keen to put his design background to use. George soon began constructing specialist awnings on a much larger scale. With his obsessive eye for detail and quality, Morco soon gained a reputation across the UK for producing outstanding awnings.

## Present Day

For over 50 years, we have established ourselves as the nation's leading design and manufacturer of custom-made awnings and canopies. We remain a family run business that prides itself on its heritage. There remains a dedicated and skilful team of craftsman and designers who all play a vital role in Morco's success story. The majority of products are still hand-built in our London workshop and a small amount are produced in Germany. Morco are keen to lead and invest heavily in pioneering new techniques or developing materials to both improve our end product and also deliver more options to our customers.

Smith & Wollensky.

Smith & Wollensky

## Design

Morco have a talented and experienced design team who are skilled at collaborating with architects, design teams, contractors or working independently to produce the best awning solution. We are able to provide sophisticated 3D-modelling on request, as well as supplying fabric samples. Morco also offer clients the opportunity to utilise their cutting-edge RAGS branding and pattern system which has revolutionised the traditional design parameters.

## Craftsmanship

Our manufacturing team are dedicated and skilled craftsmen who are proud of maintaining Morco's on-going reputation for producing awnings of outstanding build quality. Each awning is custom-made and hand-crafted, from the building of the timber box housing to sewing each individual fabric panel. Our attention to detail is second to none and is a key element in ensuring every awning manufactured in the workshop is constructed to the highest standard.

## Application

The Victorian Awning has long been regarded as an elegant and timeless solution to complete any shopfront or fascia. The Victorian is hand-crafted and its features include a classic hardwood housing, steel-forged arms and a specially developed weather-proof fabric covering. These features give the awning a traditional, yet robust quality which is much sought after across the world. The awning is also extremely customisable and has been used in a broad range of applications to achieve a striking aesthetic.

## Construction

The level of craftsmanship required to produce this awning is something we pride ourselves on. Using quality materials is also a prerequisite to produce an outstanding end product. For this reason, we use only high grade hardwood timber to manufacture the boxes that the roller is housed in. The hardwood is specially treated to offer maximum durability. All steel-forged arms and bracketry are hand-crafted to match the exact curvature of an application. In fact, every element of the Victorian Awning is bespoke, made to fit its surroundings in shape, colour and style.

## Finishing

With a wide range of timber stains, fabric colours and metal finishes available, the Victorian Awning offers endless possibilities to suit any application. All our finishes also instil the Victorian Awning with greater resilience and durability. The metalwork is powder coated, all timberwork is hand-treated and the cloth fabric is solution-dyed for protection. All these measures give the awning long-lasting resistance to the most demanding of weather conditions. There are also a number of colour options and finishes for the timber, a wide range of fabric options available and we are able to match metalwork to any RAL colour.

## Customisation

Each feature of the Victorian Awning is customisable. The hardwood can be stained or painted to a customers required specification. Metalwork can be matched to any RAL colour and we offer a wide range of colours on acrylic canvases or other options for fabric. There is also the option of a valance, that come in a number of styles. With our RAGS branding and pattern printing there are also unlimited design possibilities. With so many options, it is rare that any two Victorian Awnings leave our workshop the same. The Victorian Awning is also the only awning we offer with four types of operation; a Duo-Lux Sprung operating system, a Soft-Gear Full Winding Control, an Electro-Smart Automated Control and fixed installations.
